SUMMARY OF THE DATA ANALYSIS

| | |
|---|-------|
| No. of Institutions & Children's Home | 147 |
| No. of Children in Institutions & Children's Home | 15289 |
| No. of After Care/ Room Placement | 30 |
| No. of Young Adults in After Care/ Room Placement | 560 |
| No. of Community Based Programs | 3773 |
| No. of Children & Young Adults in Community Based Programs | 95337 |
| No. of Collaborative Networks | 655 |
| No. of Children & Young Adults reached through Collaborative Networks | 84856 |
| Migrants' Desks | 36 |
| No. of Migrant Workers Reached | 90919 |
| No. of Families Reached | 10047 |
| Personnel involved in YaR Ministry (SDB, Staff , Volunteers) | 2713 |

Dear Friends and DB YaR Family,

Greetings, and welcome to a detailed exploration of our organization performance encapsulated in the Statistical Analysis Report 2022-2023.

It is an honor to extend my deep gratitude and sincere appreciation to each province for their tremendous effort and invaluable contributions to the collection of the statistical data for the year 2022-2023.

The collaborative effort and dedication demonstrated by all 11 provinces from collection of data from the grassroots level to the coordinators have resulted in a comprehensive and insightful analysis. Your meticulously collection and sharing data from your respective centers has played a pivotal role in creating a detailed overview of our activities, achievements, and areas for growth.

The compiled statistical data not only serves as a testament to our collective commitment to the mission but also provides a foundation for informed decision-making and strategic planning. The depth of analysis reflects the passion and diligence of each province.

The members of the national team have done a tremendous job synthesizing the raw data into a meaningful narrative that will inform strategic decisions and future planning. By transforming numbers into a compelling story, the analysis brings our progress and challenges into sharp focus. It is a testament to our shared commitment and passion for the Don Bosco YaR Mission.

As we delve into the insights provided by the statistical data, let us use this opportunity to identify areas of excellence, build on our strengths, address areas needing improvement, and advance our shared goals, and collectively work towards the betterment of our community. Your commitment to transparency and collaboration is the driving force behind our success, and I am confident that this data will guide us towards even greater achievements in the future.

I encourage us all to use the document as a springboard for reflection, collaboration, and growth. Let the story reflected in these numbers guide us toward new heights of service, innovation, and community impact.

I am grateful and inspired to take this next step alongside you. Through open communication, shared learning, and relentless dedication to our mission, we will build an even brighter future for those we serve.

I would like to express a word of appreciation and gratitude to Mrs. Moumita Roy Choudhury, the National Program Coordinator, for bringing out this statistical analysis report.

With immense appreciation for all you do,

A handwritten signature in blue ink that reads "Joe Prabu". The signature is written in a cursive style and is underlined.

Fr. Joe Prabu
Executive Director

Don Bosco National Forum for the Young at Risk (YaR), also known as DB YaR Forum is the All-India network of Don Bosco Institutions and Organizations committed to the safety, growth, development, and rights of at-risk, vulnerable, marginalized children and young adults.

It tabulates statistical data each year, reflecting a commitment to data-driven decision-making, continuous improvement, and the fulfillment of its mission to empower and uplift disadvantaged youth, offering opportunities for those in need and creating positive social change. This practice involves collecting, organizing, and analyzing various aspects of their operations. By systematically recording information, Don Bosco gains valuable insights into their programs, identifies areas for enhancement, and tracks progress over time. This year all 11 provinces made an effort in extensively collecting the data and then it was meticulously compiled and tabulated into the statistical data from June 2022 to May 2023.

Statistical Data of 2022-2023

The YaR Ministry operates in 11 strategically selected provinces to address the unique requirements of the communities. These provinces include Bangalore (INK), Chennai (INM), Delhi (INN), Dimapur (IND), Guwahati (ING), Hyderabad (INH), Kolkata (INC), Mumbai (INB), Panjim (INP), Shillong (INS), and Tiruchy (INT). Each province is meticulously carved out to encompass key regional hubs and the surrounding areas, ensuring a comprehensive and efficient reach across these regions requiring the Ministry's service. This network is currently spread across 175+ settings in 125+ locations across 20 states and union territories of India, reaching out to children and young adults for their care and protection, maximum development, and best interests. This thoughtful regional distribution allows YaR Forum Ministry to enhance its ability to deliver effective and targeted support.

By monitoring trends in the data, the organization can measure the effectiveness of its programs, identify areas that may need improvement, and adapt and refine its strategies to better serve the communities it works with.

Data Analysis

Institutional Facilities

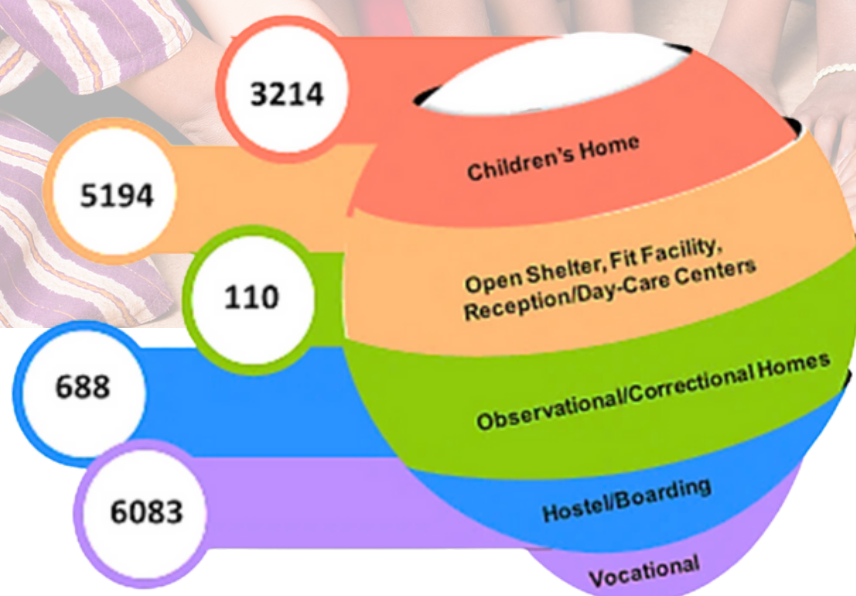

In accordance with the Juvenile Justice Act, institutional facilities aim to provide safe and rehabilitative environments for children in need of care and protection, and children in conflict with law, addressing their needs through education, counseling, and skill development for reintegration into society.

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|--|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| No. of Institutions & Children's Home (Open Shelter, Fit Facility, Reception / Day-Care Centers, Children's Home, Hostel /Boarding, Observational / Correctional Homes, Vocational Training Centers) | 13 | 27 | 6 | 3 | 6 | 21 | 15 | 12 | 8 | 2 | 16 | 147 |
| No. of Children in Institutions & Children's Home | 5544 | 1143 | 2950 | 134 | 343 | 1360 | 1360 | 857 | 282 | 627 | 1240 | 15289 |

The provided data indicates that there are 147 institutions serving 15,289 children with different needs and circumstances including orphans, those experiencing homelessness, and others who require specialized care and rely on these facilities for care and support. These institutions likely cater to the needs of children with different backgrounds and requirements, including shelter, care, and vocational training.

The high number of children (15,289) suggests considerable demand for services in the region which could be due to a range of factors including social, economic, and family-related issues. On average, each institution is responsible for approximately 103 children. This is a metric for understanding the average capacity and facilities offered to these children.

Children in Institutional Facilities

Recommendations:

- The key inference from this data is that there are different facilities in place to address the needs of children and there is a demand for these institutions and services in the region, as indicated by the large number of children. Future planning should consider the evolving needs of these children and the potential need for expanding existing facilities or establishing new ones.
- Continue to collect and analyze data to evaluate the impact and effectiveness of the programs, allowing for continuous improvement and targeted interventions to address evolving challenges faced by children and young adults.
- The implementation of a robust system for monitoring and evaluating the impact of these programs is essential to continuously enhance their effectiveness and reach.

After-care & Room Placement Facilities for Young Adults

Under the Juvenile Justice Act, After-care and Room Placement Facilities for young adults focus on supporting rehabilitation through counseling, education, and skill development, ensuring their smooth transition into independent living.

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|--|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| No. of After-care/ Room Placement | 0 | 15 | 1 | 0 | 1 | 4 | 2 | 4 | 0 | 1 | 2 | 30 |
| No. of Young Adults in After-care / Room Placement | 0 | 153 | 11 | 0 | 15 | 195 | 80 | 83 | 0 | 8 | 15 | 560 |

This data highlights the efforts to provide transitional support and housing for young adults who have left the care system, demonstrating a commitment to their successful transition to independent living in these cities.

No. of Young Adults in After-care and Room Placement

The fact that there are 560 young adults benefiting from these services underscores the importance of such programs in assisting young adults in their transition to independence, offering them guidance, and helping these individuals achieve self-sufficiency and stability in their lives. It reflects a substantial need for After-care/Room Placement services in the regions covered by the cities mentioned. This data highlights the role of After-care and Room Placement in providing a critical bridge for these young adults as they navigate the challenges of adulthood and self-sufficiency.

Recommendations:

- Cities should continue to invest in and expand programs essential to meet the substantial need for transitional support for young adults leaving the care system. Collaborative efforts should focus on further enhancing these critical bridges to ensure successful transitions to independent living.
- Foster cross-city collaboration to share successful models and best practices in addressing diverse challenges faced by youth. This will enhance the effectiveness of the programs.

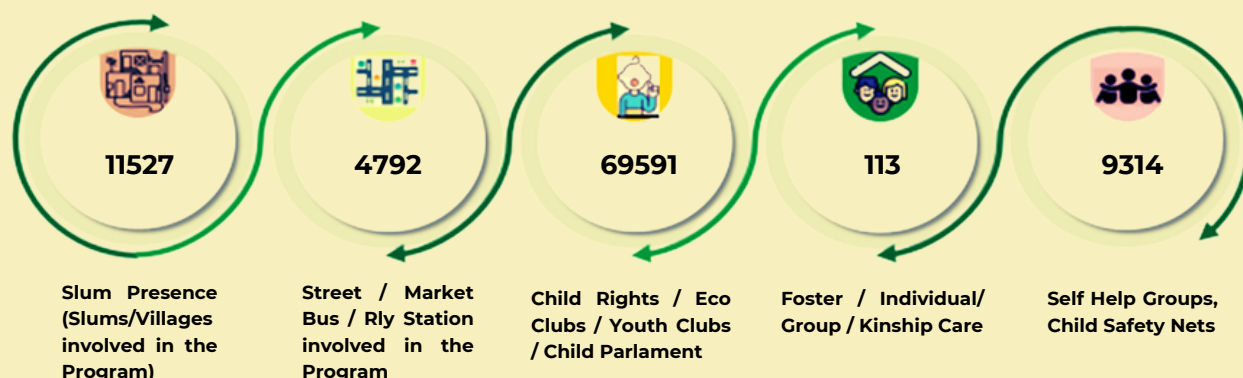

Community-Based Programs

Community-based programs are initiatives designed to address the specific needs and challenges within communities. They often involve collaborative efforts, community engagement, and empowerment to enhance social well-being, promote education, healthcare, and economic opportunities, and foster sustainable development. These programs may include interventions such as skill training and community-building activities to uplift and strengthen the social fabric of the local population.

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|---|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| No. of Community Based Programs(Slums / Villages involved in the Program, Street / Market, Bus / Rly Station involved in the Program, Child Rights/ Safety Net/ Eco Clubs/ Youth Clubs/ Child Parliament, Foster/ Individual/ Group/ Kinship Care, Self Help Groups, Child Safety Nets) | 1543 | 725 | 197 | 130 | 73 | 341 | 235 | 35 | 12 | 38 | 444 | 3773 |
| No. of Children & Young Adults in Community Based Programs | 53045 | 11457 | 6459 | 2135 | 2986 | 4726 | 770 | 1635 | 490 | 1244 | 10390 | 95337 |

The data presents a comprehensive view of Community-Based Programs across various cities. These programs on average serve around 8,667 children and young adults in each city, emphasizing the significant impact of community engagement and support in fostering well-being and empowerment.

Children Reached through Community Based Programs

Chennai with 19%, Tiruchy with 12%, Hyderabad with 9%, and Kolkata with 6% of the communities reached are actively involved in a significant number of Community-Based Programs. Bangalore leads with 41% of locations reached, indicating a substantial focus on community engagement. Hyderabad stands out with 56% beneficiaries (Children and Young[MR1] Adults) of the total followed by 11% beneficiaries from Tiruchy, underlining its dedication to children and young adults through community engagement and support.

This data exemplifies a strong dedication to addressing community challenges, playing a vital role in enhancing the well-being of individuals and communities and addressing diverse needs across different locations and initiatives in various cities.

Recommendation:

- Foster community engagement and participation, for empowering individuals and communities to actively contribute to their own well-being.
- The cities should consider diversifying intervention types with a focus on individual and kinship care to optimize program impact.
- Emphasizing long-term sustainability is essential to guarantee the enduring positive impact of these programs on community well-being and development.

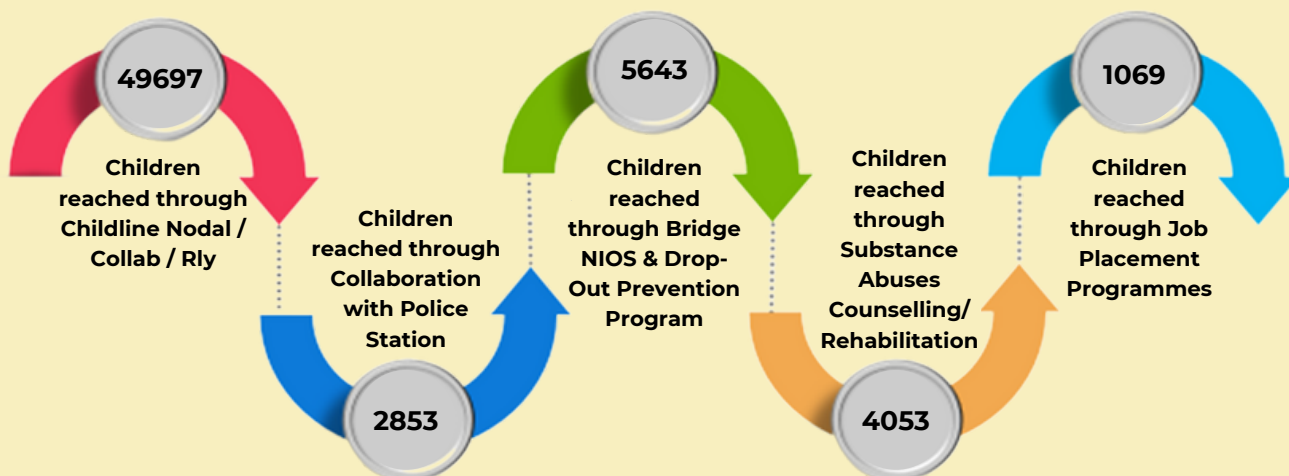

Collaborative Networks

Collaborative networks refer to strategic partnerships and alliances formed among various stakeholders, including government agencies, non-profit organizations, businesses, and community groups. These networks work together to address complex social issues, share resources, and leverage collective expertise to achieve common goals. Collaborative efforts in the social development sector often aim to enhance the impact and efficiency of programs and services, promote social justice, and improve the overall well-being of communities through a coordinated and holistic approach.

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|--|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| No. of Collaborative Networks (Childline Nodal / Collab / Rly, Collaboration with Police Station, Bridge NIOS & Dropout Prevention Program, Substance Abuse: Counselling / Rehabilitation, Job Placement Programmes) | 147 | 112 | 65 | 9 | 3 | 199 | 25 | 14 | 15 | 8 | 58 | 655 |
| No. of Children & Young Adults reached through Collaborative Networks | 38455 | 7566 | 10032 | 3929 | 70 | 8240 | 4167 | 377 | 5072 | 900 | 6048 | 84856 |

The data reveals the significant impact of Collaborative Networks in multiple cities, reaching out to children and young adults through a diverse range of initiatives.

Children Reached Through Collaborative Networks

A total of 84,856 children and young adults have benefited from these collaborative efforts, showcasing the networks' remarkable impact. Delhi and Bangalore notably lead with 10,032 and 38,455 beneficiaries, underscoring their strong commitment to collaboration. The data reflects a comprehensive approach to community development, encompassing child protection, skill development, and rehabilitation. On average, 129 children are reached across 11 provinces, indicating widespread efficacy in addressing diverse youth challenges. This data underscores cities' dedication to collaborative networks that empower young individuals, fostering well-being, protection, and opportunities. Ultimately, these initiatives contribute to community development and sustainability.

Recommendation:

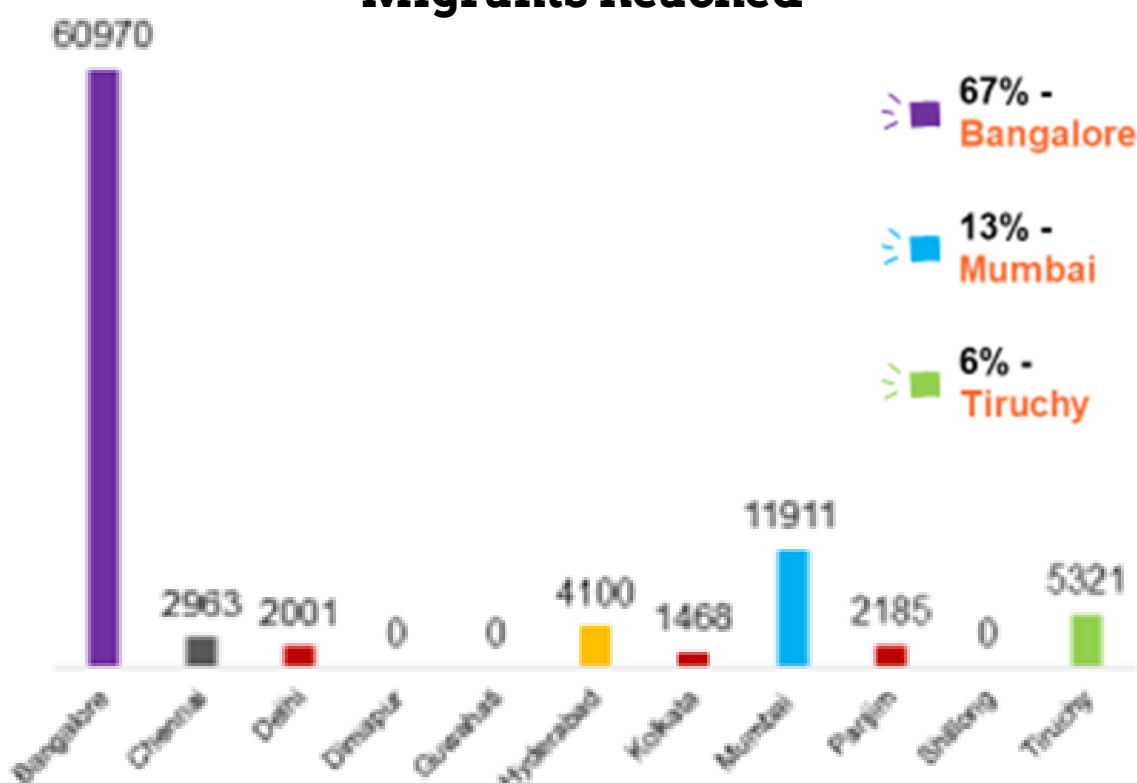

- Explore opportunities to expand Collaborative Networks to reach more children and young adults, especially in regions with lower average reach.
- Foster cross-city collaboration to share successful models and best practices in addressing diverse challenges faced by youth and ensuring the holistic development of communities. This will enhance the effectiveness of these networks, addressing the needs of the target beneficiaries.
- By adopting a forward-looking approach that considers the long-term viability of these programs, we can create a foundation for lasting positive change, ensuring that communities continue to thrive and benefit from these initiatives.

Migrant Service

Migrant services in the social development sector encompass programs providing holistic support to migrants, addressing housing, healthcare, employment, and cultural integration, fostering their well-being, and successful community inclusion. The provided data indicates that there are 36 Migrants Desks (locations), facilitating the migration of 90,919 workers who have reached various Indian cities. Data analysis reveals several key insights:

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|--------------------------------|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| Migrants' Desks | 12 | 4 | 1 | 0 | 0 | 2 | 1 | 10 | 2 | 0 | 4 | 36 |
| No. of Migrant Workers Reached | 60970 | 2963 | 2001 | 0 | 0 | 4100 | 1468 | 11911 | 2185 | 0 | 5321 | 90919 |

Migrants Reached

Bangalore and Mumbai have the highest number of migrant workers, with 67% and 13% respectively, signifying these cities as significant employment hubs and robust collection of data whereas Guwahati Dimapur, and Shillong showing nil migrant workers due to gap in data collection in these regions.

Panjim has a moderate number of migrants, implying a balanced distribution of worker inflow. This disparity emphasizes the importance of comprehensive data collection and targeted initiatives across diverse regions. This highlights the substantial scale of migration within India, demonstrating the importance of service for Migrants, esp. supporting, and addressing the needs of migrant workers during their journeys and relocations.

Recommendation:

- Implement a robust system for monitoring and evaluating the impact of these programs to continually improve their effectiveness and reach.
- By systematically tracking and assessing the outcomes and outputs of these initiatives, we can gather valuable insights that enable us to make data-driven improvements and ensure that the programs remain responsive to the evolving needs of their beneficiaries.
- It is crucial to place a strong emphasis on sustainability, by securing an enduring positive influence on community well-being and socio-economic development of migrants.
- Efficient data collection on migrants acquiring Government Identification documents like Aadhaar Card, Ration Card, etc. through Don Bosco programs is necessary. This information, coupled with insights into migrants availing government schemes, provides a valuable foundation[MR1] for tailored program development. Strategically analyzing this data enables the identification of specific needs, fostering the creation of targeted initiatives for enhanced impact.

Families Reached through Community –Based Programs & Collaborative Networks

"Families Reached through Community-Based Programs and Collaborative Networks" implies that families are the target beneficiaries of initiatives that stem from both community-based programs and collaborative networks. In essence, it emphasizes the synergy between grassroots initiatives and broader collaborative efforts in reaching and positively impacting families within a given social development context.

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|---|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| No. of Families Reached(Slums/Villages involved in the Program, Foster/ Individual / Group/ Kinship Care) | 416 | 3650 | 1055 | 0 | 4000 | 40 | 550 | 336 | 0 | 0 | 0 | 10047 |

The provided data represents the number of families reached in various cities through programs categorized by the type of intervention (Slums/Villages involved, Foster/Individual/Group/Kinship Care. In total, 10,047 families were reached.

Families Reached through Community - Based Programs & Collaborative Networks

9941

No. of Families Reached through Slum Presence (Slums/Villages involved in the Program)

106

No. of Families Reached through Foster / Individual / Group / Kinship Care

The analysis indicates that Guwahati and Chennai have the highest numbers of families reached, with 40% and 36% families, respectively followed by Delhi and Kolkata reaching 11% and 5% families. Bangalore is the only province focusing on Foster/Individual/group/Kinship care with a reach of 106 families. The number of families reached through slums-involved programs is around 9,941.

Recommendation:

- By encouraging the exchange of successful models and best practices, we can significantly enhance the effectiveness of these networks, making them better equipped to meet the needs of their target beneficiaries. This collaborative approach will amplify the impact of our efforts and create a more comprehensive framework for community development.

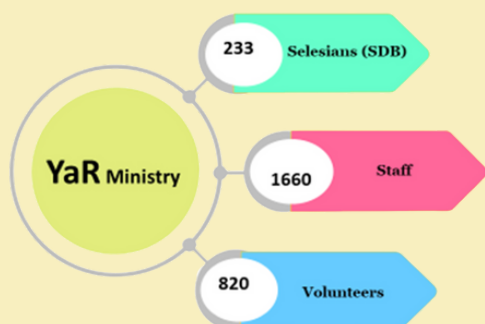

Personnel Involved in Young at Risk (YaR) Ministry

The personnel involved in the Young at Risk (YaR) Ministry typically include dedicated professionals, volunteers, and support staff committed to addressing the needs of vulnerable youth. Their roles involve guidance, mentorship, and the implementation of programs aimed at fostering the well-being and positive development of young individuals facing challenges.

| Components | Bangalore | Chennai | Delhi | Dimapur | Guwahati | Hyderabad | Kolkata | Mumbai | Panjim | Shillong | Tiruchy | Total |
|--|-----------|---------|-------|---------|----------|-----------|---------|--------|--------|----------|---------|-------|
| Personnel involved in YaR Ministry (SDB, Staff , Volunteers) | 641 | 339 | 198 | 245 | 199 | 249 | 295 | 195 | 87 | 27 | 238 | 2713 |

The data provides information about the number of personnel involved in the YaR Ministry across different cities or regions. Bangalore had the highest personnel involvement with 24% individuals, indicating a significant presence of the ministry in that region. The total number of personnel across all cities is 2,713, highlighting the scale of human resources dedicated to the YaR Ministry.

Personnel's in YaR Ministry

This breakdown illustrates the distribution of different roles within the ministry, with staff members playing a significant role. It's essential for effective resource management, as it helps allocate responsibilities, define roles, and ensure the ministry's smooth operation by utilizing a mix of SDBs, staff, and volunteers to achieve its objectives.

Recommendation:

- The data also provides insights into areas where additional recruitment or support may be required for the successful implementation of the ministry's program.
- Regular updating and capacity building of the workforce through modern communication channels are essential to keep pace with evolving trends. This ensures employees stay informed on relevant topics, fostering continuous improvement and adaptability, ultimately enhancing organizational efficiency and competitiveness in today's dynamic professional scenario.

CONCLUSION

There are two primary models for child welfare: Institutional and Non-Institutional. In the Institutional model, 177 institutions cater to 15,849 children, while the non-institutional model, involving 4,428 locations of community-based and collaborative programs, serves a significantly larger number of 180,193 children.

This underlines the critical need to expand such initiatives to empower our youth. We must be adaptable and forward-thinking to anticipate and adapt to changing children's needs. Transitional support, such as that provided by After-care care, is critical in the development of young adults leaving care.

Some YaR Centres are not fully carrying out programs, either because of limited human resources or finances. At the same time, other YaR Centres having carried out some activities are sharing incomplete data. This makes it hard to gather accurate data and have accountability. It shows there needs to be better use of resources and coordination. With better planning and teamwork, implementation can be strengthened despite limitations in some places.

Cross-regional collaboration, diverse approaches, and rigorous monitoring are required to drive continued improvements. We may foster beneficial long-term growth and development by prioritizing community engagement, self-reliance, and sustainability. Prioritizing these factors will enable cities to truly empower children, improve neighborhood well-being, and assure long-term regional prosperity. In conclusion, this statistical data information promotes adaptable, institutional, and non-institutional models that focus on youth transitions, community participation, and long-term outcomes as preferable means to empowering our youth and communities today and in the future.
