PRESENTATION

Technology has become a catalyst for social change. Homelink Network of DB YaR Forum has worked tirelessly in promoting the use of technology in YaR centres. This is mostly used for tracking the young at risk, understanding the emerging issues and in efficiently managing the centres. We have spared no efforts in inventing and using simple technical tools and processes to solve larger problems. We are happy to present some milestones in this innovative journey through this report. Thanks to our children, network partners, donors and all our supporters. Appreciation to all our staff and our implementing institutions.

Let us strive to find the hidden solutions in the 'data' using the latest technology and move forward to build a better future for our children and young at risk.

CHALLENGES TO REFLECT WITH DATA

Centres of DB YaR Forum deals with thousands of data of children every year. Some of them invest in research on the newer challenges of the young at risk. Most of these research studies involve time and resources. Very seldom the findings of these studies reaches to the staff and the field workers to take the necessary steps. Snippets   simplifies these studies into a simple format for increasing the   knowledge and leads to reflection.

READ

Snippets are easy to read & understand. Does not require special skills to understand and interpret.

REFLECT

The ques-tions and the statements that are sent along with the snippet helps in trig-gering reflection and discussion among the care-givers.

SHARE

Snippets can be shared using social media like WhatsApp, twitter etc. to the wider audience. This can help in keep-ing the supporters informed about the progress in the care.

SNIPPET

A step towards Data Driven Decision Making

Data SPEAKS

91
National
Snippet

Every Monday National office released a snippet through social media handles on a chosen topic with a question or statement for reflection
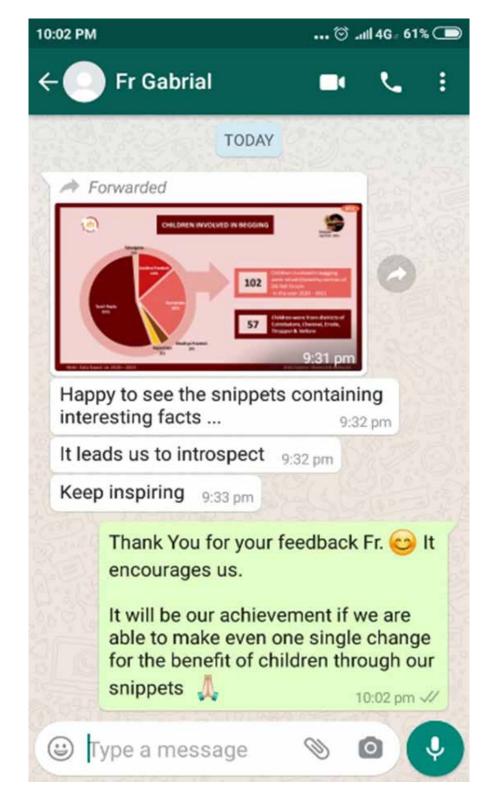

134
Regional
Snippet

Eight regions across the nation chose different days of the week to share snippets of their region or a centre in the social media handles to project the regional data for action and reflection

Feedback & Impact
of Snippet

• New centres registered in the ChildMISS tool

• Snippet used for reflection and decision making in the originations. Example:- Child Marriage snippet lead to initiation of preventive programs on child marriage in Trichy Province. Child Abuse snippet used for creating awareness programs on child abuse in Chennai Province.
